Ubuntu 22.04 on Dell Leptops

Robert Klein*

December 4, 2023

- For the comands, open a Terminal using the key combination `CTRL`+`Alt`+`t`.
- The disk is encrypted, you get a password when you get the laptop. Please change the password using the command *change-disk-password.sh*. For security reasons you'll have to type your account password first.
- Please change your initial login password using the command *passwd*.
- Pleaes update the system regularly using the command *install-updates.sh*.
